New Quay Wall Works - Alexandra Quay West, Berth 28

As part of the Alexandra Basin Regeneration Project, Alexandra Quay West, Berth 28 new quay wall works are planned to be completed. It is expected that these works will take place from the 27th March 2017 to the 28th November 2017. (circa 8 months duration)

The works generally consist of the construction of approximately 125m long new quay wall and will provide new Berth 28 at the North West corner of the Alexandra Basin. Behind the quay wall a 42m wide concrete apron on piles will be constructed to function as a multipurpose berth. Two crane rail foundation beams will be installed to support a zinc/lead ship loader.

All craft will monitor Channel 12 continuously and show the required lights and shapes. All vessels should pass at slow speed and make due allowance for this operation.

VTS will keep all vessels updated and advised of any relevant information.
