

## Energy Policy

The principal activities of Dublin Port Company (DPC) are to facilitate the efficient flow of goods and passengers through the port. The company provides the infrastructure, facilities, services and hard standing areas to meet with the needs of our customers and to allow the transfer of goods and passengers between sea and land.

"Dublin Port is committed to improving its energy performance in order to minimise energy costs, minimise the environmental impact of energy consumption by its facilities and services, and make a contribution toward the attainment of national energy efficiency and renewable energy targets."

In support of the ISO 50001 Energy Management System and this policy DPC is committed to:

- Defining objectives and targets based on identified improvement opportunities and monitoring these in line with defined action plans.
- Ensuring the availability of information and necessary resources to achieve approved objectives and energy targets
- Satisfying applicable legal and other requirements related to energy efficiency, energy use and consumption
- Continually improving energy performance and the Energy Management System
- Supporting the procurement of energy efficient products and services
- Supporting energy performance improvement in design activities
